THE CHRONICLE.

D. F. WRIGHT, M. D., Editor.

Clarksville, Tenn., Aug. 9, 1879. TERMS: 82.00 IN ABVANCE.

WHEAT-TERNIPS-MANURE. We take our text to-day from two paragraphs in our neighbor the Toacco Leaf. The two are discon-

s a very close connection between Mr. Johnson Goostree has sown a large field in turnips, and expects to make 3,000 bushels if the season suits. If the demand is good they will be for sale; if not, then he has fine cattle enough to eat them, and will furnish good beef next spring. We spent a plensant day at Mr. Goostree's last week. He is no slouch of a farmer by any means, but one who makes it pay. Everything is done in apple ple orier; building, stock, sheds, fencing, etc., kept in good repair. Mr. Goostree lives about four miles from town, a splendid farm on Red river.

nected as therein printed, but there

The wheat-sowing season will soon be a

that service know, what no one outide of it can appreciate, the yearning affection which existed between stomachs, and hunger was a chronic affection in the C. A.; and in the medical department there was alaforesaid difficulty. If this statement does not account to our readers for the profound sympathy between the two departments, they must remain unenlightened; those of them who were in the C. S. A. will need no further explanation.

Can Have a House! Wheat Seeding for 1879!

THE MARYLAND

Fertilizing and Manufacturing Co. Are prepared to furnish the following well known brand of Fertilliza

Ammoniated Super Phosphate!

A complete manure for all crops, adapted to lands that require a full development of the crop, both straw and grain.

Alkaline Super Phosphate An article very rich in Soluble Phosphate of Lime and the Alkalies.

DISSOLVED PHOSPHATE!

A high grade Super Phosphate of Lime.

to the acre does well.

The Alkaline and Dissolved Phosphate have special reference to the growth and development of the grain, and are intended for lands that produce a sufficient growth of straw but small crops of grain. They have been used successfully for a number of years by the best farmers of Maryland and Virginia, alongside of the highest grades of Ammoniated Phosphates, and in some sections have entirely superceded them. The fine mechanical condition of our Fertilizers are such that they drill readily, and we recommend the use of the drill as being most profitable for the application of Fertilizers. Sowing broadcast 200 pounds

Price \$45.00 per ton, \$2.25 per hundred pounds. Any further information will be cheerfully given by WHITAKER & CO., Agents, August 2, 1879-3m
